PRIMARY HEALTH CARE CENTER

The Tuscarawas County Health Care Clinic provides primary health care services to all residents of our county regardless of whether the resident does or does not have an entrance with the private sector for medical care. These health care services include:

1986 Clinic Visits

2,358 Well-child examinations

1.934 Pre-natal

5,084 Family Planning

1,741 Dental Clinic care

2,488 All adult care, gynecological

1,159 Speech Therapy

341 Cardiac, P.O.D. & Orthopedic Clinics

2,709 Immunizations

358 Tuberculin skin testing

881 Pregnancy tests

4,018 WIC

8,049 Blood Pressure Screening

Dental Services

The Tuscarawas County General Health District Dental Clinic provides its patients with affordable and necessary dental care. The Dental Clinic staff provides patients with both preventative and restorative dental services.

Family Planning Services

The Family Planning staff provides physical examinations, education and counseling to those men and women desiring the choice of when to begin a family and the spacing of their family. Family Planning education is also presented to schools and other groups that desire information.

W.I.C.

The Women, Infants and Children's Program; a special health program funded by the U.S.D.A. and administered by the Ohio Department of Health and Tuscarawas County General Health District, helps correct nutrition related health problems pertaining to mothers and their children by providing nutritional assessments, supplemental foods and nutrition information.

Women must be pregnant, less than six months post-partum, or breastfeeding an infant less than one year old to be eligible. Children must be less than five years old. Eligibility is also based on medical/nutritional evaluation, economic needs and area of residence.

As of March 1987, W.I.C. provides care for 1,819 participants.

1986 WIC Participants

January - 1,749 April - 1,741 August - 1,785 December - 1,816

Prenatal and Post-Partum Services

Prenatal care encourages expectant mothers to begin care for their newborn child as soon as possible and post-partum care focuses on helping new mothers care for their newborn.

HOME HEALTH SERVICE

Your Tuscarawas County Home Health Care program serviced the health needs of 514 patients and rendered 12,101 visits to homebound residents of Tuscarawas County in 1986.

The services provided include skilled nursing, speech therapy, home health aide, physical therapy and homemaker services.

To be eligible for Home Health Care Services, one must be under the care of a physician, and in need of intermittent skilled nursing care. Referrals may come from a physician, hospital, family member or patient himself. The frequency and duration of visits depends on each individual patient. The Home Health Nurse assists the attending physician and other professionals to add to the quality of life and health in Tuscarawas County.

This program . . .

1. Shortens the patient's hospital stay.

2. Allows patients to stay in their own home if they choose.

Relieves the financial responsibility of the patient and family if the patient can be at home instead of being institutionalized.

The Speech Therapist also serves the Home Health Section of the Health Department. Patients suffering from stroke-induced speech impairment are tested and therapy provided. Individuals suffering from brain damage incurred in auto accidents have also been treated.

School Health Nursing

The County School Nursing Program is also provided by the Home Health and Outreach Services Division, providing services in seven (7) local school districts in 1986. A total of 424 school nursing visits were provided during the year. The nursing staff provides screening services such as hearing, vision and scoliosis (spinal curvature). Students needing treatment for hearing, vision or scoliosis related problems are referred to the proper health care professionals. The nursing staff also assists health education instructors with information

"OUR CONCERN IS YOUR GOOD HEALTH"

Many people don't realize it, but if you live and breathe ir Tuscarawas County you are a recipient of your Health Distric services.

Public Health consists of working through organized community effort to prevent disease, promote health and improve the quality of life for everyone. While a few aspects of public health deal with treatment of disease or infirmity, the main thrus of a community Health Department is toward disease prevention and health promotion through appropriate personal and environmental health services to people.

Good public health services are aimed at helping each individual achieve the level of health which allows him or her to reach his or her maximum potential. It is also clear that community health serves everyone - whether or not one ever personally visits the Health Department. Through preventative services which exert a restraining effect on the cost of health care generally, public health services help you save your money while you save your health.

This report is intended to inform you of your Health Department's many services and we hope that it will assist you ir getting the most out of your Health Department. Feel free to cal us about any of these services. After all, they are for everyone

Tuscarawas and Carroll Counties Alcohol and Addiction Center

The Alcohol and Addiction Center has shown a high degree of effectiveness over the past years. In 1986, our local outpatient program demonstrated a 43% approved discharge rate, compared to recent statewide outpatient norms under 30%. Our local program has expanded its services while maintaining a significantly higher approved discharge rate than many other Ohio alcohol treatment programs. Admissions in 1986 were up 42% over 1985.

The Alcohol and Addiction Center views alcoholism and chemical dependency as major health problems. As with any disease, chemical dependency affects not only the individual, but the whole family. The Alcohol and Addiction Center's services include individual and group counseling, family counseling, information and referral, and Antabuse therapy. Since the agency is housed in a public health setting, medical as well as behavioral needs are met.

The mission of the Alcohol and Addiction Center is to safely detoxify the individual via outpatient supervision or by referral to inpatient detoxification/rehabilitation services. It must be remembered that chemical dependency is a primary disorder that must be treated first in order to apply other treatments for additional problems. The dependency must be placed in remission and then underlying psychological problems can be treated.

This year marked a grant award for the joint liaison project between our agency and Harbor House, Inc. Due to a high correlation between domestic violence and alcoholism, this area is one of our foremost concerns.

Chemical Dependency Education

Another service of the Alcohol and Addiction Center is the educational program. This includes distributing information and presenting programs for area organizations and schools. Presentations are available in the areas of drug addiction, alcoholism, codependency, and prevention, intervention or treatment concerns. The Alcohol and Addiction Center also conducts a DWI Counterattack School and Remedial Driving Course.

Alcohol and Addiction Center Data 1986

	SESSIONS	CLIENTS
Individual & Family Counseling	985	361
Group Counseling	624	105
D.W.I. School	224	78
Remedial Driving School (2-Pt. Reduct.)	97	56
Week-long Camp with Children	32	30

TUSCARAWAS COUNTY GENERAL HEALTH DISTRICT

1986 . . . Responding to Needs Harch 1986

This Annual Report of the General Health District reflects the public health services provided to residents of Tuscarawas County during 1986. That was a year of consolidation of gains and responding to new and emerging needs.

Using health levy funds while maintaining our state and federal grants and reasonable fee schedules, we were able to produce the rather comprehensive range of direct and educational health services you'll find displayed in this Report . . . the kind of services that have kept your Health district ranked among some of the better local health departments in Ohio for the past 3 or 4 decades.

In 1986, we responded to the emerging public health need for a more responsible, results oriented education program in the area of sex and sexual behavior, especially among young people. We substantially overcame the backlog in School immunizations and health screenings that had accrued during the financially-forced suspension of our School Nursing program during 1982-1984 and, we introduced computerization of many clinic and accounting records for more cost effective operations. And, we improved visibility of many Health District services through appropriate publications, news articles, radio programs and personal appearances.

It is our pleasure, as public health workers, to bring you this wide range of public health services. The voters' support of the health levy in 1984 suggests peoples' increasing awareness that preventive medicine, public health and wellness services are generally cost effective. Indeed, public health services benefit the lives of virtually everyone . . whether or not they ever visit the health department offices.

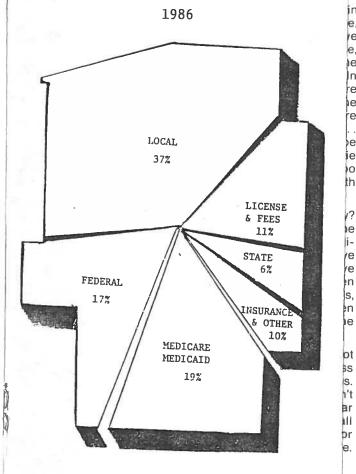

Again, as always, thanks to the many citizens and volunteers who continue to support our efforts day by day. We'll strive to continue delivering quality public health services to you and your neighbors in the most cost effective manner . . . in cooperation with other public and private health care providers in our community.

Sincerely,
Herbert J. Shubick, M.S.
Health Commissioner

Robert C. Hastedt, M.D. Medical Director des

ACCOMPLISHMENTS

- * Added a Satellite Clinic in Sugarcreek.
- * Initiated Parenting Classes at the Health Dept. under contract with Personal & Family Counseling Services, Inc.
- * Accepted an 11% increase in Clinic Visits over 1985 to reach record totals...including many immunizations referred by local physicians.
- * Introduced the computerized Health Risk Appraisal (HRA) on a limited basis for individuals and groups.
- * Increased total llome Health Visits by 10.6% over 1985.
- * Achieved a 43% approved discharge rate for clients of the Alcohol & Addiction Center.
- * Expanded sex and sexual behavior education programs & materials through school and parental groups, aimed at preventing premature sexual involvement, sexually transmitted disease and unwanted pregnancies among teenagers.
- * Started on-site, "Non-Stress" testing of high risk, expectant mothers for improved quality of prenatal care at the Clinic.
- * Began defining the disaster role of the Environmental Health Division as part of the developing county-wide disaster plan.

FUTURE GOALS

- * Accurately assess priority health risks among the citizens of Tuscarawas County via a community health risk appraisal survey.
- * Help reduce the number of unwanted teenage pregnancies & the rate of increase in sexually transmitted diseases through education and counseling.
- * Assist in developing a more effective health and wellness education system throughout the County.
- * Help reduce the incidence of alcoholism and drug addiction & improve rehabilitation services to those with chemical dependency problems.
- * Promote public participation in a preventive approach to environmental health problems.
- * Improve efficiency of services via carefully selective application of modern data and communication systems.
- * Continue to provide quality home health & clinic care when needed, regardless of a resident's inability to pay.
- * Improve child & adult preventive care and early disease detection services.

ENVIRONMENTAL HEALTH

THE PRICE OF SUCCESS

Yesterday, we all knew environmental pollution controls were needed. Today, we can look around and recognize our past needs, our successes and our failures in pollution control. Tomorrow, what kind of environment will we leave for future generations? The answer lies with all of us... and the price we are willing to pay.

Your Environmental Health staff is charged with certain responsibilities involving pollution information, surveillance, abatement and, of course, public education. We cannot deny we have pollution in Tuscarawas County; it's well documented. We, along with other citizens, might sometimes be offended by the publicity that points to pollution problems in our community. In reality, however, we should be glad when genuine problems are brought to light so they can be dealt with. It demonstrates the wave of concern that is being expressed throughout our entire nation about pollution and destruction of our environment ... land, air, and water. This concern is a healthy one that must be nurtured in young and old alike ... and never be allowed to die like the classic American "fad." The problems are simply too real and too persistent ... and the price of failure to deal with them is too high.

What have we accomplished and what will be our legacy? Well, we've faced up to some problems and have paid **part** of the price of preventing pollution. Industries are cleaning up, municipalities have installed sewage treatment plants and we have standards for home, on-site sewage disposal systems. We have solid waste laws and regulations; open dumps have been closed. We have subdivision standards, air quality standards, and water quality standards. So, as a society, we have been doing some things about pollution and have had some successes.

However, the American economy marches on, delivering not only some of the prosperity we all want, but also a relentless stream of impacts upon our land, air and water resources. Therefore, resting upon our accomplishments to date won't save our environment from further deterioration. We must gear up for improved handling of pollution problems. And all Americans must face up to paying either the price of success or the price of failure in this area. Either way, it's going to cost more.

HOME HEALTH SERVICE

Your Tuscarawas County Home Health Care program serviced the health needs of 514 patients and rendered 12,101 visits to homebound residents of Tuscarawas County in 1986.

The services provided include skilled nursing, speech therapy, home health aide, physical therapy and homemaker services.

To be eligible for Home Health Care Services, one must be under the care of a physician, and in need of intermittent skilled nursing care. Referrals may come from a physician, hospital, family member or patient himself. The frequency and duration of visits depends on each individual patient. The Home Health Nurse assists the attending physician and other professionals to add to the quality of life and health in Tuscarawas County.

This program . . .

- 1. Shortens the patient's hospital stay.
- 2. Allows patients to stay in their own home if they choose.
- Relieves the financial responsibility of the patient and family if the patient can be at home instead of being institutionalized.

The Speech Therapist also serves the Home Health Section of the Health Department. Patients suffering from stroke-induced speech impairment are tested and therapy provided. Individuals suffering from brain damage incurred in auto accidents have also been treated.

VITAL STATISTICS

The Vital Statistics division of your Health Department maintains records of the births and deaths in Tuscarawas County since 1908. The attending physician or person in attendance at the time of birth files a certificate with the local registrar for each live birth occurring in the County. The funeral director is responsible for filing a certificate for each death occurring in the County.

Certified copies of birth and death certificates are available at the state-mandated charge of \$7.00 each. Two dollars of this fee goes to the State Child Abuse Fund. You may contact the Vital Statistics Registrar during regular Health Department hours. Your Health Department issued 4,874 birth and death certificates in 1986. There were 831 births in Tuscarawas County during 1986.

The following data has been compiled from the original certificates of death.

Leading Causes of Death	1986	1985	1984
Heart & Circulatory	328	322	335
Respiratory	123	140	110
Cancer	86	79	94
Vascular, Central Nervous System	42	68	74
Accidents	18	18	17

HEALTH EDUCATION

The Tuscarawas County Health Department Health Educator promotes awareness of disease prevention methods, preventive medicine and wellness services within Tuscarawas County to individuals and groups of all ages. Public speaking engagements, media presentations and tours of the Health Department are available on a no-charge basis.
