COVID-19 FAST FACTS

During this time, remember to be kind. Thank those in the service industry, appreciate our healthcare workers, and be patient with those working on the front lines of the outbreak. We're all in this together.

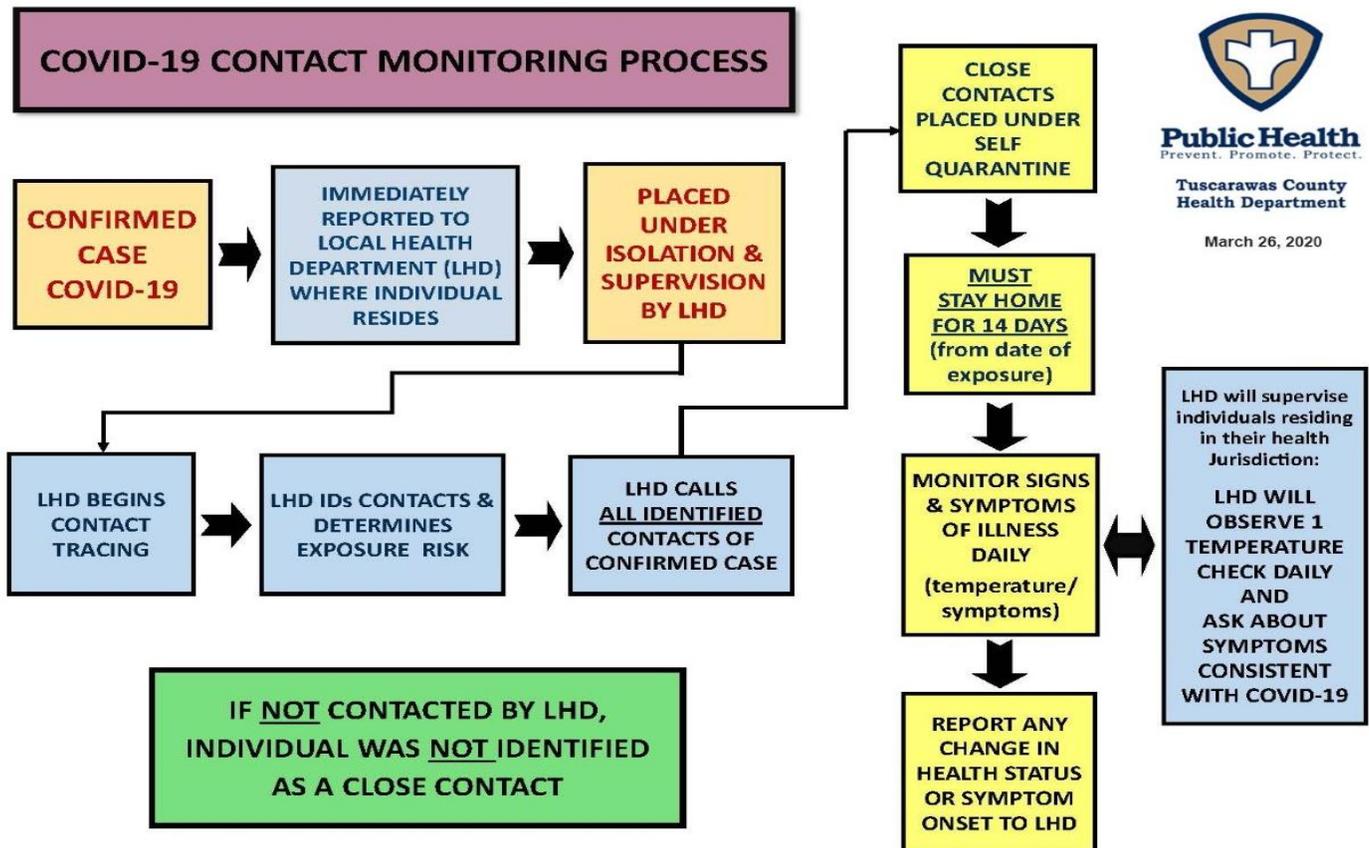

Please note: TCHD will not be sharing information about individuals under public health supervision or under voluntary quarantine for COVID-19 in our County. These individuals are not showing any symptoms and are not under investigation. As is our normal practice when we monitor situations of infectious disease in the community, information will be shared as is necessary to protect the public while respecting individual privacy. As with other diseases, we do not routinely share suspected case information until it is confirmed. The same will be done with COVID-19.

*As of March 26, 2020

Many calls have come in from employers and employees regarding Director Acton's Stay at Home order and how it pertains to them. Businesses, employees, and residents should follow these guidelines:

- The Tuscarawas County Health Department (TCHD) will NOT provide interpretation of the Stay at Home order.
- Businesses are encouraged to read the full order to determine if their business meets the guidelines to be considered essential. If further assistance is needed, the business should seek legal counsel for interpretation of the order and an opinion of their specific case.
- Businesses who feel they are essential should have documentation ready to justify their position if/when an inquiry is made by the local health department.
- ALL complaints/inquiries about a business, outside of the New Philadelphia city limits, should be submitted in writing to the Tuscarawas County Health Department, 897 E. Iron Ave., Dover, OH 44622 or via email to director@tchdnow.org. Complaints within the city limit of New Philadelphia should be directed to the New Philadelphia Health Department.
- If there are perceived violations, the TCHD will investigate, first through soft enforcement, and, if necessary, by working with the appropriate law enforcement agency.

There have also been many calls about what happens when a COVID-19 case is confirmed. Please see the following chart that outlines our process:
