- Reproductive Health and Wellness Program
- Solid Waste Program
- Tattoo and Body Piercing Program
- Tobacco Use Prevention Program
- Water Safety Program (Well and Septic)
- WIC Program (Women, Infants, and Children Supplemental Nutrition Program)

A note from the Health Commissioner...

March 2024

Dear Tuscarawas County Community,

As I reflect on our progress in 2023, I offer my deep appreciation for the privilege of serving you through our many public health programs and services. Together, our dedicated professionals strive to build a sustainable environment, healthier families, and thriving communities right here in Tuscarawas County. Furthermore, our Board of Health and staff also remain deeply committed to serving county residents with excellence through our efforts to prevent serious illness and injury, promote optimal health, and protect safe sources of water and food.

With the official end of the Federal Public Health Emergency Designation for COVID-19 on May 11, 2023, much of the year was centered on restoring our connection with Tuscarawas County communities. We enjoyed opportunities to attend or conduct events and health fairs from Bolivar to Newcomerstown, from Sugarcreek to West Chester, and most county communities in between. Our staff prevented serious flu and COVID-19 illnesses through special vaccination drive-up events, including our record-breaking flu drive-up event with 144 immunizations administered. We promoted good health by adding evening medical appointments two days a week, investigating over 2,000 communicable diseases, and sharing more than 100 health and safety tips through our social media pages. We protected the environment through the collection of 17 tons of scrap tires and the collection of hazardous waste products from 204 vehicles. We even helped pet owners prepare for emergencies by supplying more than 500 pet emergency preparedness bags for the community. Then, as respiratory illnesses began to increase in late fall, we distributed more than 2,000 special infection prevention bags to help community members weather cold and flu season. Please take a little time to read through this annual report to learn more details about our services and accomplishments during 2023.

I am thankful and honored to lead our talented, hard-working public health team in serving you, the valued citizens of Tuscarawas County.

Please know that even with the accomplishments of this past year, our organization remains committed to continuous improvement. We will not rest on our laurels. We will always look for new ways to enhance our programs and add or strengthen community services to better meet your needs. We will maintain and enhance our working relationships with our many partner organizations and community leaders who assist us in meeting our goals and making our progress possible.

As always, your input and suggestions are welcome as we work to focus on our strategic priorities of community focus and engagement, and organizational infrastructure improvements. I am thankful and honored to lead our talented, hard-working public health team in serving you, the valued citizens of Tuscarawas County.

Sincerely,

Katie Seward, MPH, CHES
Tuscarawas County
Health Commissioner

Health Department

Financial Health

In 2023, TCHD provided \$53,303 in charity health care through sliding fee discounts.

Financial Stewardship

Financial stewardship and accountability are priorities of the Tuscarawas County Health Department (TCHD), and we are grateful for the 25% of our 2023 revenue that was provided through levy funding. At the end of 2023, TCHD had grown by five staff persons over the previous year with 65 (49.24 full time equivalent between full and part-time staff) public health professionals.

* Please note that at the time of report publication, the financial data included herein had not yet been audited for Fiscal Year 2023.

**2023
Beginning Balance:

Accreditation Statement

The Tuscarawas County Health Department earned National accreditation from the Public Health Accreditation Board (PHAB) in the Spring of 2019. In 2023, the agency continued to meet the high standards and performance measures while striving to improve overall department operations to work toward maintaining accreditation.

As a Nationally accredited health department, TCHD maintains a level of organizational performance that aligns with nationally recognized, practice-focused, and evidence-based standards.

Promoting Good Nutrition & Healthy Families Through WIC

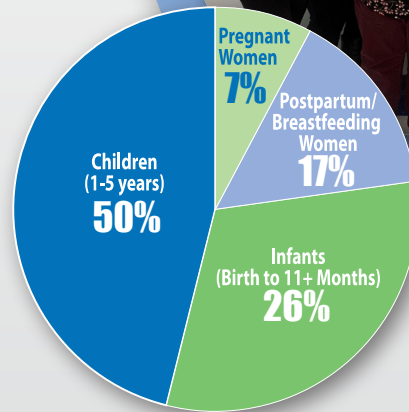

Department of Health

Women, Infants, and Children Program (WIC)

2023 WIC Statistics

Total WIC Visits	5,627
New WIC Clients	1,205
Percentage of Infants on WIC who were breastfeeding at birth	59%

WIC is a special supplemental nutrition program for Women, Infants, and Children (WIC). The program helps income-eligible pregnant and breastfeeding women as well as infants and children up to five years of age who are at risk for health problems due to inadequate nutrition. WIC serves clients five days a week at our Dover location and one day a month at Dennison thanks to a partnership with Trinity Health System Twin City Medical Center.

2023 WIC Participants By Category

Protecting Families

Throughout 2023, Tuscarawas County Health Department staff enjoyed several opportunities to participate in health fairs and special events to reach more than 3,000 residents with educational messages related to TCHD services as well as injury and disease prevention tips.

Health Department**

Traffic Safety & Teen Driving Rodeo

Throughout 2023, TCHD continued work with community partners to promote traffic safety messages to aide in the prevention of vehicle accidents. Safety messages included Click It or Ticket; Drive Sober or Get Pulled Over; Look Out for Motorcycles; and Stay Alive, Don't Text & Drive. Thankfully, fatal crashes decreased in 2023 from the previous year.

After a three-year hiatus due to the Pandemic, the 26th Annual Teen Driving Rodeo returned on April 13, 2023 at the Tuscarawas County fairgrounds. Hosted by the Tuscarawas County Health Department in partnership with numerous area organizations, the event featured high school student teams from seven area schools who competed in safe driving tests and maneuverability courses to win cash and bragging rights for themselves and their schools. The Safety Rodeo helped young drivers learn better driving skills, learn the rules of the road, and think more carefully about their actions while driving.

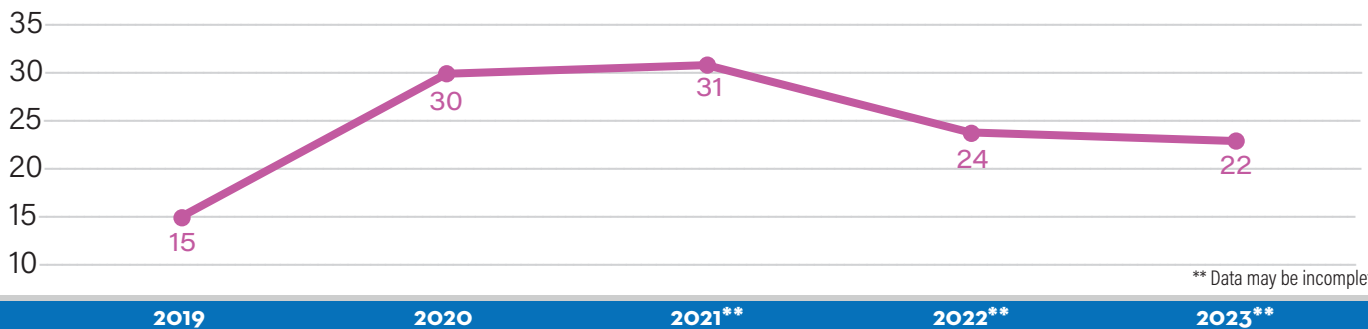

Preventing Overdoses with Project DAWN (Deaths Avoided With Naloxone)

Project DAWN is a community-wide naloxone (also known as Narcan) distribution program that provides free naloxone kits and education for those who struggle with addiction and any community member who wants to help save lives by reversing overdoses. Training topics include how to recognize the signs and symptoms of a drug overdose and how to use naloxone to quickly reverse an overdose caused by an opioid drug.

In 2022, TCHD distributed **553** naloxone kits to the community and recorded **62** overdose reversals. In 2023, the program grew with **1,111** naloxone kits distributed and **81** overdose reversals recorded.

Unintentional Drug Overdose Deaths in Tuscarawas County Residents

Protecting the Environment

The Tuscarawas County Health Department works behind the scenes to protect the environment. Environmental health (EH) specialists inspect restaurants, grocery stores, campgrounds, tattoo and piercing establishments, and swimming pools. EH specialists permit drinking water wells, septic systems, and solid waste landfills. They also work to correct nuisance situations that are reported by the public.

Food Safety: The Food Safety program licenses and regulates all food service operations and retail food establishments including restaurants, grocery stores, mobile, temporary, and vending machine operations to assure that all comply with applicable laws.

Water Safety (Well and Septic):

Point of Sale Inspections of well and septic systems are completed by environmental health specialists. Evaluations of new and replacement home sewage treatment systems are completed by water quality environmental health specialists.

Camps, RV, and Recreation Parks:

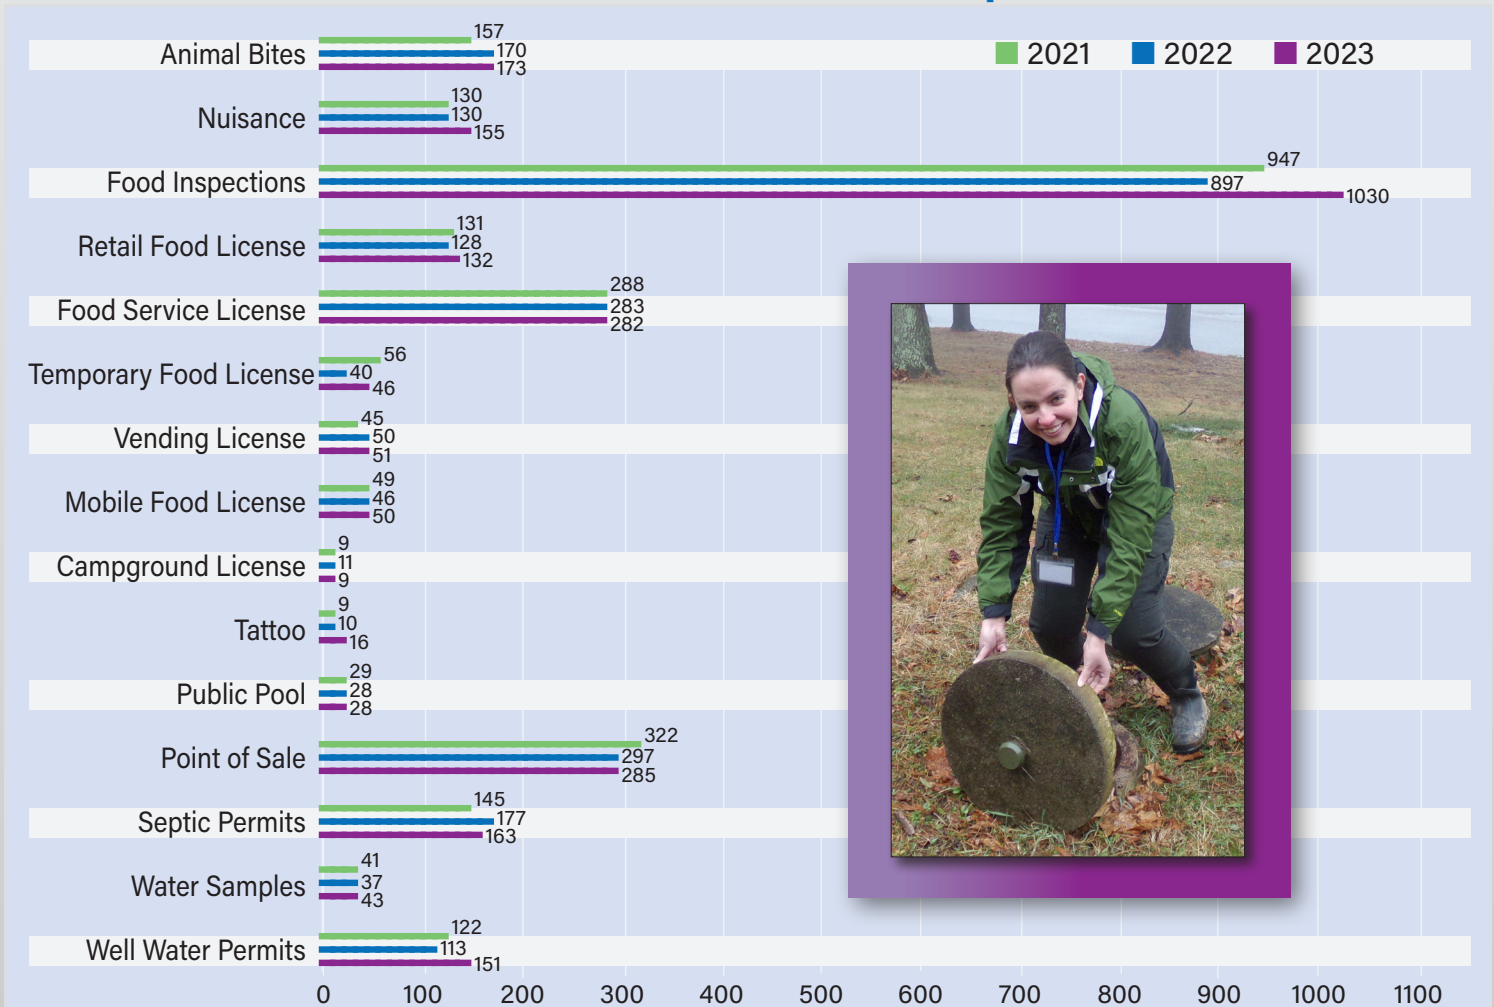

The goal of this program is to reduce potential risk for the spread of communicable disease as well as injuries and assure that parks and camps are maintained in compliance with laws and rules through inspections.

Pools, Spas, Beaches: Inspected to minimize safety hazards, reduce potential risk for disease transmission, and assure that waters are in compliance with ordinances.

Nuisance: Environmental health specialists investigate septic, food, water, school, tattoo parlor, piercing, and solid waste nuisance complaints.

Meet Cody

During the summer of 2023, the Tuscarawas County Health Department gained a very special new "staff" member, Cody. Obtained from a reputable breeder in Tuscarawas County, Cody is a red golden retriever who volunteers as a facility dog in training at TCHD.

He loves people and spends most of his day receiving lots of love and treats. While Cody primarily assists TCHD staff by boosting morale and lowering workplace stress, he also enjoys visiting and serving other locations in the community. In October 2023, Cody helped calm children who attended TCHD's drive-up events to get flu and COVID-19 vaccines. In November, he spent time at Tusky Valley to comfort students and staff.

Community Health Worker

The Tuscarawas County Health Department partners with Bridges to Wellness to provide a community health worker to assist individuals in need of resources such as smoking cessation, insurance assistance, mental health services, primary care, or linkages to social service agencies. Bridges to Wellness is a non-profit organization out of Access Tusc that collaborates with other organizations in the community to deploy Community Health Workers to assist the most vulnerable populations. A community health worker (CHW) is a frontline public health worker who is a trusted member of and/or has a close understanding of the community served. This trusting relationship enables the CHW to serve as a liaison to link clients with health/social services and improve the quality and cultural competence of the service delivery. In 2023, under the direction of the TCHD Clinical Supervisor, our community health worker served 81 clients including those of varying populations: pregnant women, adults 50 and over, pediatric clients, and newborn children.

Community Events

From Back to School events to the Tuscarawas County Fair and more, our TCHD staff participated in more than 30 community events across the county in 2023. We also enjoyed hosting some special tours of our building, including an educational event for Indian Valley eighth grade students, a tour for newly elected County Commissioners, and special community pick-up events for 500 pet emergency preparedness bags and over 2,000 infection prevention bags to help the community.

"Thank you for being such a good steward of our health."

- Comment on Facebook page about infection prevention bag project

Tuscarawas County Health Department Received New Grant Funding to Add Community Services in Late 2023

Thanks to three new grant awards, Tuscarawas County children and older adults will benefit from new injury prevention programs, and families will have improved access to services that will pave the way for healthy pregnancies. The Tuscarawas County Health Department (TCHD) was awarded three new multi-year grants totaling \$295,000 from the Ohio Department of Health. Two of the grants will help prevent injuries in children and older adults and one grant will assist adults of childbearing age with health improvements.

Specifically, the new child injury prevention grant will reduce childhood injuries and deaths by enabling TCHD's public health educators to provide services to improve transportation safety for children through teen driving, bicycle, and pedestrian programming. The grant also enables staff to focus on reducing youth violence and child maltreatment. Through the new injury prevention among older adults grant, TCHD's public health educators will work with older county

residents to emphasize fall prevention strategies. Finally, TCHD's new preconception health and wellness grant will improve the overall health and well-being of county residents of child-bearing age by promoting healthy lifestyles, reducing barriers to care, providing access to health services, and encouraging the establishment of a reproductive life plan to improve maternal and child health outcomes before, during, and even after pregnancy.

COVID-19 Response Efforts

During 2023, Tuscarawas County Health Department continued with efforts to help minimize the spread of COVID-19 and prevent severe illness and hospitalization through the provision of drive-up COVID-19 tests, COVID-19 home antigen test distribution, COVID-19 vaccine and booster clinics, regular health communication messages, and more.

Even with the ending of the Federal Public Health Emergency designation for COVID-19 on May 11, 2023, we encourage taking steps to prevent serious forms of the illness. We recommend getting the COVID-19 updated vaccine, using at-home tests, staying home when you are sick whenever possible, and wearing a high quality mask when visiting older persons and those with chronic conditions.

COVID-19 Statistics for 2023:

- COVID-19 Immunization and Booster Doses Administered: 1,056 (4,145 in 2022)
- COVID-19 Tests Conducted: 218 (2,196 in 2022)
- COVID-19 Cases Diagnosed in Tuscarawas County Residents: 2,565* (7,919 in 2022)
- COVID-19 Related Deaths Reported in County Residents: 23* (100 county lives were lost to COVID-19 in 2022. Cumulative total of 558 Tuscarawas County resident lives lost to COVID-19 from January 2020 through December 31, 2023.)

* Data not yet finalized from the Ohio Department of Health
